

SOUTH SUDAN - NEEDS ANALYSIS WORKING GROUP (NAWG)

June - July 2025 Analysis

Number of counties in each severity band for the June - July 2025 analysis period

For more information on the Needs Analysis Working Group or the NAWG Analytical Framework, please contact Felix Omunu (omunu@un.org) or Rebecca Hetzer (rebecca.hetzer@impact-initiatives.org).

Background

The NAWG meeting was held on August 5th, 2025 to discuss the analysis from the **June - July** period.

The objective of the NAWG is to conduct evidence-based and contextualized analysis of essential needs across South Sudan to inform decision-making and prioritization. To enable this, the NAWG analytical framework (NAF) was developed. The NAF provides a systematic approach to interpret a wide array of multi-sectoral information and monitor needs at the county-level. The final classification (ranging from extreme to minor humanitarian needs) is an intersectoral measure of the severity of humanitarian conditions in a county, allowing for comparative analysis between counties and across time.

The NAF encompasses data from a variety of sources (including **FSNMS, ISNA, IPC AFI and AMN, SMART surveys, JMMI, ACLED, IRNAs, REACH data, IOM DTM, WHO IDSR, PRMS, and data from Clusters**) which inform the following indicators:

- **Underlying vulnerability**
 - Proportion of female-headed households, child-headed households and other vulnerable-group headed households
 - Proportion of IDPs and/or returnees compared to host communities
 - Longitudinal food insecurity
- **Protection**
 - Reports of explosive hazards, lack of access to humanitarian assistance, restriction of movement, sexual violence, family separation, HLP issues, child labour, civil documentation issues, among others
 - Armed conflict events and/or conflict-related sexual violence and/or forced recruitment of children and/or targeted killings of civilians and/or targeted property destruction
- **Displacement**
 - Number of displaced persons arriving and/or number of returnees returning, as significant numbers of arrivals has the potential to exacerbate food and resource access
- **Disease**
 - Disease outbreaks, including cholera, measles, meningitis, and malaria, among others
- **Food insecurity**
 - IPC AFI classifications are used for each county
- **Malnutrition**
 - IPC AMN classifications or SMART survey data are used to estimate crude mortality

Needs severity levels

Severity band	Indicator threshold	Severity level definitions
A	8 - 10	Extreme humanitarian conditions
B1	7 - 7.9	Severe humanitarian conditions (higher severity)
B2	6 - 6.9	Severe humanitarian conditions (lower severity)
C	4 - 5.9	Moderate humanitarian conditions
D	2 - 3.9	Stressed humanitarian conditions
E	0 - 1.9	Minor or acceptable humanitarian conditions

SOUTH SUDAN - NEEDS ANALYSIS WORKING GROUP (NAWG)

June - July 2025 Analysis

Counties facing “extreme” humanitarian conditions

The backend analysis classified seven counties in Band A (‘Extreme humanitarian conditions’): **Abyei, Ayod, Fangak, Malakal, Nasir, Pibor and Ulang.**

Discussion and joint analysis

- **Luakpiny/ Nasir:** In four locations in June, almost one-quarter of households (23%) exhibited ‘Very Severe’ hunger; this exceeds the IPC famine threshold for food consumption (20%). Further, 25.4% of children aged 6-59 months were malnourished, according to MUAC screening; this also exceeds the IPC famine threshold for acute malnutrition by MUAC (15%). **Final classification: Maintain in Band A.**
- **Ulang:** In five locations in July, 11% of households exhibited ‘Very Severe’ hunger; this is five-times the rate in 2024. Further, 23.4% of children aged 6-59 months were malnourished, according to MUAC screening; this exceeds the IPC famine threshold for acute malnutrition by MUAC (15%). **Final classification: Maintain in Band A.**
- **Tonj East:** On July 12, clashes erupted in Wunliet Payam, Tonj East, resulting in a reported fourteen fatalities. Clashes resumed in Wunliet again on July 23. **Final classification: Maintain in Band B1.**
- **Tonj North:** Cattle raids and intercommunal violence were reported through the June-July analysis period. Information on humanitarian conditions, especially on critical needs and displacement trends, is limited. **Final classification: Maintain in Band B1.**
- **Canal/ Pigi:** Aerial bombardment and armed clashes continued through the June-July analysis period; fatalities were reported, and an unspecified number of cattle were raided. Information on humanitarian conditions, especially on critical needs and displacement trends, is limited. **Final classification: Maintain in Band B1.**
- **Akobo:** Three of six humanitarian food distributions in 2025 were reportedly missed, according to an implementing partner in Akobo East; the quantity of pre-positioned food is also reportedly insufficient to complete the lean season distribution cycle. Furthermore, services at the hospital were impacted when health workers went on strike to protest unpaid wages. **Final classification: Maintain in Band B1.**
- **Longochuk:** Udier Payam was impacted by bombardment and violence several times on July 9, 10, 18 and 30. Humanitarian access is heavily constrained; UNHAS cancelled flights on numerous occasions. Implementing partners are reportedly unable to

distribute critical supplies given the continued threat of bombardment. **Final classification: Maintain in Band B1.**

- **Panyijiar:** On June 18, armed clashes were reported between armed youth from Panyijiar and Yirol East. On June 23 and 24, airstrikes reportedly targeted cattle raiders in Panyijiar. An assessment in June reported widespread displacement in Pachak, Pachar and Pachienjok payams; meanwhile, rising flood waters had displaced households in the greater Ganyiel payams. The assessment recorded 37,600 displaced persons (3,495 households) in six sites. **Final classification: Maintain in Band B1, under close monitoring.**
- **Bor South:** Flood water has reportedly impacted 76,000 people living in Bor South. The State-level ICCG reported that a significant number of displaced persons (previously sheltering in Bor Town IDP sites, the former PoC) were affected. **Final classification: Maintain in Band B2.**
- **Tambura:** Multiple attacks on IDP sites in Mupoi Payam resulted in an unknown number of fatalities and widespread displacement, some as far as neighbouring Nagero County. Armed clashes continued through July, including on the outskirts of Tambura Town. Increasingly volatile conditions spread panic among civilians: anecdotal information suggests some avoided their farm land, fearful of armed groups in the surrounding areas. Further, operations at the Tambura Hospital were impacted because staff and civilians were unable to travel to the facility. **Final classification: Maintain in Band B2, under close monitoring.**
- **Kajo-Keji:** An armed confrontation between South Sudanese and Ugandan forces on July 28 displaced between 8,000-16,000 civilians, mostly children and women. Partners reported widespread food shortages, inadequate shelter and extremely poor sanitation, which threatens to drive an increase in communicable diseases. **Final classification: Maintain in Band C.**

Counties Flagged for Close Monitoring

The following counties have been flagged for close monitoring to encourage partners to gather more information and closely track the evolving situation. **Partners are encouraged to pay close attention to these counties and share any relevant information.**

- **Ayod (Band A):** Airstrikes in Fangak in early June displaced 26,000 people into Ayod. Access constraints on humanitarian operations were also reported. **Final classification: Maintain in Band A.**
- **Abyei (Band A):** Amiet market was attacked on July 22. Though the situation has since calmed, members of armed groups from Sudan were reportedly present. **Final classification: Maintain in Band A.**

- **Rubkona (Band B1):** An ongoing and alarming cholera outbreak (18,856 cases as of August 3) threatens to deteriorate further during the rainy season. **Final classification: Maintain in Band B1.**
- **Mundri East (Band C):** Between June 11 and July 18, a series of armed clashes in the Kediba area, including ambushes, resulted in mass displacement of civilians. **Final classification: Maintain in Band C.**
- **Pochalla (Band C):** Seasonal flooding beginning on July 21 threatens the harvest across Greater Pochalla, particularly in the southern region. Prolonged flooding could lead to widespread crop loss in the northern and southern areas. **Final classification: Maintain in Band C, under close monitoring.**
- **Yirol East (Band C):** Between June 28 and July 5, a series of violent incidents - including an ambush on a boat, clashes at Shembe Port, and reported airstrikes near Kolier Island - were reported along the River Nile. Tensions remain high, with mobilisation observed between July 22-24, indicating a risk of further clashes. **Final classification: Maintain in Band C.**
- **Renk (Band B1):** In June 2025, Onward Transportation Assistance (OTA) was suspended due to funding shortfalls; the Transit Center exceeded 300% capacity as of July 11. This, combined with a broader scale-down in basic humanitarian services, including healthcare and WASH, as well as alarming rates of acute malnutrition and catastrophic hunger among returnees from Sudan, raises the risk of a severe public health crisis in the rainy season. As many as 60,000 people cannot access clean water in the eastern corridor, according to one partner. Ongoing cholera and hepatitis-E outbreaks pose a considerable threat: the number of people infected with hepatitis-E has reached 700. **Final classification: Maintain in Band B1, under close monitoring [with special emphasis on the severity of the situation and the importance of an urgent multisectoral response].**

Please note that the NAWG will be paused until the publication of the new IPC classifications, as the second projection period for IPC AMN and AFI ended in June and July, respectively. A tentative resumption date is expected in October or November 2025.
